

SELECT HARVESTS
High quality natural products

Welcome to Select Harvests

Select Harvests is one of Australia's largest almond growers and the country's leading manufacturer, processor and marketer of nut products, health snacks and muesli to the Australian retail and industrial markets, in addition to exporting almonds globally.

We are also one of Australia's largest almond exporters, with a focus on building strong relationships in the fast growing markets of India and China, as well as supporting established customers in Asia, Europe and the Middle East.

Our geographically diverse almond orchards are at or near maturity. Located in Victoria, South Australia and New South Wales our portfolio includes more than 8,900 hectares (22,000 acres) of company owned, leased and joint venture almond orchards.

Our Allinga Farms brand delivers bulk almond product all over the world. The name 'Allinga' originates from the Australian indigenous language meaning sun. Almonds grown under the Australian sun have an international reputation for consistent good quality.

Extra Fine

A vibrant advertisement for almond milk. On the left is a maroon carton with a white cap. A stream of white almond milk is being poured from the carton into a white glass on the right. Several almonds are suspended in the air, appearing to be part of the milk stream. The background is a soft-focus green field under a blue sky. The carton features the text 'Almond Milk' in a white script font, '30 CALORIES PER SERVING' in a dark circle, and '1 LITRE' at the bottom. A gold banner at the bottom of the carton contains the text 'Rich in vitamin E and healthy fat'.

Select Harvest quality

Our Select Harvests' owned orchards plus other independent orchards supply our state-of-the-art primary processing facility at Carina West in north-west Victoria and our value added processing facility at Thomastown in the Northern Suburbs of Melbourne. Our primary processing facility has the capacity to process 22,000 metric tonnes of almonds in the peak season.

Quality

Select Harvests is committed to its continuous quality improvement program. Investing in leading electronic sorting equipment ensures a highly accurate grading process. Climate controlled warehousing delivers product freshness and improved shelf life. An on-site chemical testing laboratory undertakes quality analysis prior to shipment. Our accreditations include HACCP and SQF. We also have pasteurisation technology available to further enhance product safety and quality.

Select Harvests operates under an approved sustainability program.

Our goals include: minimising environmental impacts, improving our diversity by growing our business through sustainable farming, production and processing facilities. Select Harvests achieves this by consuming both water and energy more efficiently, recycling /reducing waste and by investing in systems to eradicate inefficient processes.
